

THANK YOU

**IN THE NAME
OF BIODIVERSITY
AND HUMAN HEALTH**

We, the undersigned environmental, consumer and medical organizations say **THANK YOU**, for not agreeing to the re-authorization of glyphosate.

- ✓ You have taken into account the fact that the European Pesticide Regulation 1107/2009 is based on a hazard-based approach, according to which agents that repeatedly cause cancer in animal experiments, and provoke cancer in humans shall not be approved.
- ✓ You have also taken into account that "the objective of protecting human and animal health and the environment should take priority over the objective of improving plant production" in regard to EU pesticide approvals.
- ✓ Also you have taken this decision based on the fact that European law is based on the precautionary principle to protect human, animal and environmental health, now and for future generations from exposure to hazardous chemicals.

Your decision is crucial and has a major impact for humans and the environment in Europe.
